No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     sequence 14, sequence 14, sequence 16, sequence 16, sequence 95, sequence 24, sequence 28, sequence 4, sequence 6, sequence 6,

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                       8, 2004, 12:58:43; Search time 13.3 Seconds (without alignments) 62.106 Million cell updates/sec
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Sequence 8, Ap

Sequence 27, Application US/09723251A

Patent No. 6608028

GENERAL INFORMATION:

APPLICANT: Clark, Youne May-Yee

APPLICANT: Clark, Ross G.

APPLICANT: Comman, Henry B.

APPLICANT: Comman, Henry B.

APPLICANT: Robinson, Iain C.A.F.

APPLICANT: Skelton, Nicholas J.

TITLE OF INVENTION: INSULIN-LIKE GROWTH FACTOR AGONIST MOLECULES

FILE REPERENCE: P1071P2C1.2Rev

CURRENT APPLICATION NUMBER: US/09/723,251A

FRIOR APPLICATION NUMBER: US 09/337,227

PRIOR APPLICATION NUMBER: US 09/337,227

PRIOR FILING DATE: 1999-06-22

PRIOR FILING DATE: 1997-04-04
